

LE MOBILE REMOTE RECORDING TRUCK PARKING AND POWER REQUIREMENTS

POWER

The power requirement is 100 amps per leg (single phase, two legs) We create our own neutral via isolation transformer with source AC voltages from 208V to 250V

Electrical hook up runs need to be within 250 feet of Le Mobile (2 hots and 1 ground, no neutral required).

Camlock is our standard power connector.

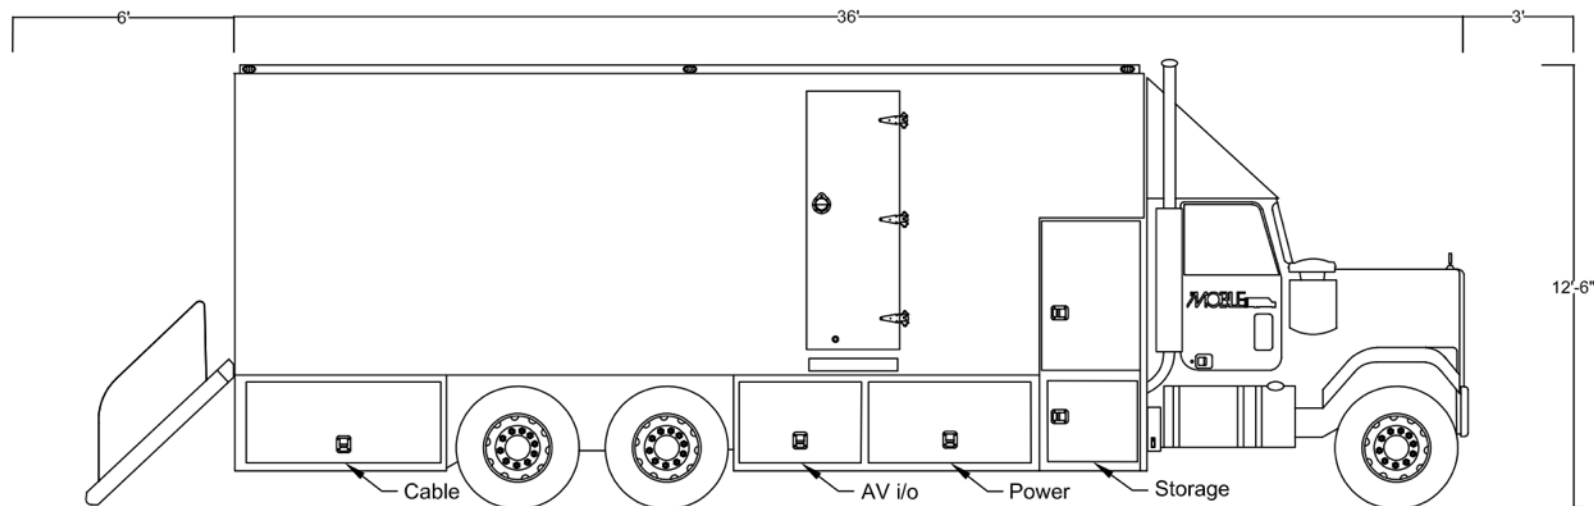

PARKING

Space requirement for the truck is a minimum of 45ftX12ft to allow rear and side stair entry to the truck as well as access the storage compartments.

Height of the truck is 12'-6"

Weight of the truck is 52,000 pounds

(Please verify height and weight requirements if planning to have the truck setup on a structure)

SIDE VIEW (SETUP)

Driver side storage compartments are identical to passenger side (as shown) with storage for additional cabling, microphones, stage boxes and other equipment
